## EDUCATION

**Indian Institute of Information Technology, Una** Aug 2023 – May 2027
*B.Tech in Electronics and Communication Engineering* CGPA: 7.25

## EXPERIENCE

**Full Stack Developer Intern —** Sahii Present
*Wholesale e-commerce platform (early-stage startup) · Remote*

- Shipped 15+ production REST APIs and server-side business logic in Node.js/Express/MongoDB, integrating frontend components with backend services for a live wholesale e-commerce platform.
- Built typo-tolerant product search with Meilisearch and Fuse.js, and rewrote key MongoDB queries, cutting slow-query response time and improving search relevance for end users.
- Improved Core Web Vitals and SEO by optimizing server-side rendering and asset delivery, directly supporting production deployments and resolving live incidents.
- Worked across the full stack (Node.js, Express, EJS, Tailwind CSS) in a small team, owning features end-to-end from design to deployment.

## PROJECTS

**Chaos Proxy — HTTP Fault-Injection Proxy** GitHub
*Node.js, TypeScript, Express, React, Socket.IO, WebSockets*

- Built an HTTP fault-injection proxy from scratch on raw Node.js http streams, handling concurrent connection forwarding, piping, and error recovery without a framework.
- Designed a triangle-wave fault degradation model to simulate realistic network failure patterns, with a real-time pipeline computing p50/p95/p99 latency and failure-rate metrics.
- Built a threshold-based assertion engine that auto-halts fault injection on p99 latency or failure-rate breaches, configurable live via REST APIs.
- Shipped a live React + Socket.IO dashboard streaming telemetry and visualizing latency/fault trends with Recharts, including a configurable load generator.

**Mendly — Electronics Repair Service Platform** Live GitHub
*React, Node.js, Express.js, MongoDB, Socket.IO, Razorpay, RAG, Pinecone*

- Built a full-stack repair-service marketplace connecting customers with verified providers across 3 RBAC roles, with booking management, live chat, order tracking, and reviews.
- Implemented JWT access/refresh auth with httpOnly cookie sessions, Redux state, and rate limiting (100 req/15 min), plus Socket.IO for real-time messaging and Razorpay for secure payments.
- Designed a scalable MVC backend with MongoDB indexing and Zod validation; deployed on Azure Web App achieving sub-150ms average API response time.
- Integrated a RAG-powered support chatbot using the Groq API and Pinecone for context-aware, low-latency customer assistance.

## TECHNICAL SKILLS

- **Languages:** Java, JavaScript, TypeScript, Python, SQL, HTML, CSS
- **Frameworks & Libraries:** React, Express.js, Socket.IO, Redux, Tailwind CSS, Bootstrap, LangChain, Zod
- **Backend & Databases:** Node.js, REST APIs, MongoDB, PostgreSQL, Redis, Supabase
- **DevOps & Cloud:** Docker, AWS EC2, Azure Web App, GitHub Actions, Nginx, Vercel, Render
- **AI/LLM:** RAG, Pinecone, Groq API, Llama 3.3, Sentence Transformers
- **CS Fundamentals:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

## ACHIEVEMENTS

- Solved 500+ DSA problems across LeetCode, CodeChef, and GeeksforGeeks; achieved a 2-Star rating on CodeChef.
- Published 2 open-source npm packages, including Auth7-kit, a reusable authentication utility library.
- Finalist — Top 5% of 200+ teams at Hack the Hills 2025 for a working full-stack prototype.
- Social Media Head, EPMOC Club, IIIT Una — led social strategy and promotional content for technical events.
