Education

B.Tech in Electronics and Communication Engineering **Aug 2023 – May 2027**
Indian Institute of Information Technology, Una *CGPA: 7.25*

- **Eureka Public School, Narnaul – Class XII** **83.4%**
- **Eureka Public School, Narnaul – Class X** **92.4%**

Experience

Phi Launcher **Oct 2025 – Dec 2025**
Frontend Developer *Remote*

- Developed responsive frontend with **React.js** and **Tailwind CSS**, delivering **8+ UI sections** with reusable components following scalable architecture patterns.
- Reduced initial bundle size by **67% (1200 KB to 400 KB)** using route-based code splitting and lazy loading across multiple routes.
- Improved **Lighthouse performance score** from **60 to 99** by auditing **10+ pages**, optimizing render paths and **Core Web Vitals.**

Auth7-kit – Express Authentication Library **Ongoing**
Open Source Project

- Developed and published an open-source **npm authentication library** for **Node.js** and **Express.js**, providing **JWT authentication**, refresh tokens, email verification, and password reset functionality.
- Designed a configurable, reusable authentication framework with **dynamic MongoDB schema** support, reducing integration effort for developers; reached **200+ weekly npm downloads**.

Projects

Mendly – Electronics Repair Marketplace | *React, Node.js, Express, MongoDB, Socket.IO, Razorpay, RAG* **GitHub**

- Developed a full-stack **MERN marketplace** connecting customers with repair service centres, featuring **role-based access control**, **real-time chat**, online service booking, and **Razorpay** payment integration across **3 user roles** and **100+ service listings**.
- Implemented secure **JWT authentication** with access tokens, **httpOnly** refresh cookies, and **Redux**-based state management for authenticated user sessions.
- Built a scalable **MVC backend** using **Express.js**, **Socket.IO**, **MongoDB indexing**, and **Zod validation**; integrated a **RAG-powered AI chatbot** for contextual customer support and deployed on **Azure Web App**, achieving **sub-150ms API latency**.

DocFusion – AI Document Analysis Platform | *FastAPI, Python, Redis, FAISS, React, Docker, Supabase* **GitHub**

- Built an **AI-powered document analysis platform** using **FastAPI**, OCR, and RAG to analyze PDFs, scanned images, and text files, generating summaries for documents up to **50+ pages** in under **10 seconds**.
- Implemented a **FAISS-based semantic retrieval pipeline** with MiniLM embeddings and **Redis/RQ** background workers for **scalable** document processing and low-latency AI inference.
- Integrated **Supabase** authentication, document history, **Dockerized** deployment, and pipeline monitoring for **OCR**, retrieval, queue, and LLM latency, cutting manual debugging effort by **30%**.

Technical Skills

Programming Languages: Java, JavaScript, TypeScript, Python
Frontend Technologies: HTML5, CSS3, ReactJS, Redux, TailwindCSS, Bootstrap
Backend Technologies: Node.js, Express.js, FastAPI, REST APIs, Socket.io, Uvicorn, Azure Web App
Databases & AI: MongoDB, MySQL, Redis, Supabase, Pinecone, FAISS, LangChain, RAG, Groq API
Tools & Platforms: Git, GitHub, Docker, NPM, Postman, VSCode, Cloudinary, Cloudflare, Render, Vercel, Zod, PyPDF2

Achievements

- Solved **400+ DSA problems** across LeetCode, CodeChef, and GeeksforGeeks.
- Achieved a **2-Star CodeChef Rating**, demonstrating consistent performance in competitive programming.
- Published **2 npm packages**, including Auth7-kit.
- **Finalist (Top 5% among 200+ teams)** at **Hack the Hills 2025** for developing a full-stack application working prototype.
- Served as **Social Media Head, EPMOC Club, IIIT Una**, managing the club's social media presence.
