Education

B.Tech in Electronics and Communication Engineering **Aug 2023 – May 2027**
Indian Institute of Information Technology, Una

Experience

Sahii **July 2026 – Sept 2026**
Full Stack Developer Intern *Remote*

- Engineered a **cross-order item-level PO engine** in **Node.js, Express, MongoDB** that pools identical SKUs across customer orders and supports **split-quantity multi-vendor awarding**.
- Built a **zero-login RFQ portal** with **tokenized URLs** and **QR codes**, plus automated RFQ and PO alerts via the **WhatsApp Cloud API**.
- Designed a **real-time webhook sync** with the live e-commerce platform, auto-mapping orders across **10 categories and 22 subcategories** and computing **gross margin**.
- Shipped **10+ REST APIs** with **JWT auth**, **Zod** validation, and **RBAC across 3 roles**; automated deployments using **GitHub Actions** and **PM2**.

Projects

Chaos Proxy - HTTP Fault-Injection Proxy | *Node.js, TypeScript, Express, React, Socket.IO, WebSockets* **GitHub**

- Developed a **chaos-engineering HTTP fault-injection proxy** from scratch on raw **Node.js** streams, handling **concurrent** connection forwarding, asynchronous I/O, and error recovery without a framework.
- Designed a **triangle-wave fault degradation model** with a live **observability** pipeline computing **p50/p95/p99 latency** and failure-rate metrics to simulate gradual service degradation.
- Delivered a **threshold-based assertion engine** that auto-halts fault injection on latency or failure-rate breaches (a safety guardrail), paired with a **React** and **Socket.IO** real-time monitoring dashboard built with **Recharts**.

Mendly - Electronics Repair Service |*React, Node.js, Express.js, MongoDB, Socket.io, Razorpay, RAG, Pinecone* **GitHub**

- **Deployed and hosted** a full-stack repair-service marketplace on **Azure Web App** with **sub-150 ms** average API response time, connecting customers with verified providers across **3 RBAC roles**, with booking management, live chat, order tracking, and reviews.
- Secured the platform with **JWT access/refresh authentication** using **httpOnly** cookie sessions and API **rate limiting** (100 req/15 min); integrated **Razorpay** for secure payments and **Redux** for client state management.
- Created a **RAG-powered support chatbot** using the **Groq API** and **Pinecone** vector database to deliver low-latency, context-aware responses to customer queries.

Technical Skills

Languages: Java, JavaScript, TypeScript, Python, SQL, HTML, CSS
Computer Science: Data Structures & Algorithms, Operating System, DBMS, Computer Networks, OOPS
Backend & Databases: Node.js, Express.js, REST APIs, MongoDB, PostgreSQL, Redis, Supabase, Cloudinary
Frameworks & Libraries: ReactJS, Next.js, Socket.IO, Redux, TailwindCSS, Bootstrap, Zod
DevOps & Deployment: Docker, GitHub Actions, AWS EC2, Azure Web App, Cloudflare, Nginx, Render, Vercel, Git, Postman
AI & LLM: RAG, Vector Databases (Pinecone), Semantic Search, Groq API, Llama 3.3, LangChain

Achievements

- Solved **650+ DSA problems** across LeetCode, CodeChef, and GeeksforGeeks.
- Achieved a **2-Star CodeChef Rating**, with **Global Rank 162** in **CodeChef START260C**.
- Published **2 open-source npm packages**, including Auth7-kit.
- **3rd Position** at **Hack the Hills 2025** for a full-stack solution for farmers.
- **National Semi-Finalist** at **Flipkart Grid 7.0**, among teams competing nationwide.
- Ranked **300th among 8000+ teams** in **Amazon ML Challenge 2026**.
- **Social Media Head**, EPMOC Club and **Design Team Member**, ECOVA Club, IIIT Una.
